CONTRIBUTIONS

FROM THE

LABORATORY OF VERTEBRATE

BIOLOGY

Numbers 41 to 50

(1948-1951)

Ann Arbor

UNIVERSITY OF MICHIGAN PRESS

The *Contributions from the Laboratory of Vertebrate Biology* are issued at irregular intervals by the Institute of Human Biology, University of Michigan.

CONTENTS

NUMBER

41. Differences in the field activity of two female color phases of *Colias* butterflies at various times of the day. William Hovanitz. (37 pp., 20 figs. April, 1948.)

42. Occurrence of neoplasms in three related individuals of laboratory-bred *Peromyscus*. Maurice T. Fliegelman and Van T. Harris. (7 pp. October, 1948.)

43. Dispersal, amount of inbreeding, and longevity in a local population of prairie deermice on the George Reserve, southern Michigan. Walter E. Howard. (50 pp., 2 pls., 24 figs. April, 1949.)

44. Variation of *Peromyscus maniculatus* in parts of western Washington and adjacent Oregon. Lee R. Dice. (34 pp., 3 figs. October, 1949.)

45. A geographic study of the herpetofauna of Alta Verapaz, Guatemala. L. C. Stuart. (77 pp., 9 pls., 2 maps, 1 fig. May, 1950.)

46. Reliability of laboratory-bred stocks as samples of wild populations, as shown in a study of the variation of *Peromyscus polionotus* in parts of Florida and Alabama. Don W. Hayne. (56 pp., 5 figs. May, 1950.)

47. Variation in the spontaneous activity of *Peromyscus*, as shown by recording wheels. Lee R. Dice and Sherman A. Hoslett. (18 pp., 1 fig. September, 1950.)

48. Population structure, social behavior, and environmental relations in a natural population of the beach mouse *(Peromyscus polionotus leucocephalus)*. W. Frank Blair. (47 pp., 2 figs. June, 1951.)

49. The herpetofauna of the Guatemalan Plateau, with special reference to its distribution on the southwestern highlands. L. C. Stuart. (71 pp., 2 maps, 7 pls. August, 1951.)

50. Distance of dispersal by prairie deermice from birthplaces to breeding sites. Lee R. Dice and Walter E. Howard. (15 pp., 3 figs. August, 1951.)
